ART UNIT

PAPER NUMBER

1756

DATE MAILED: 06/28/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/798,385	Applicant(s) NISHIKAWA ET AL.	
	Examiner Shean C. Wu	Art Unit 1756	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-15 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-15 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim language “capable of developing a biaxial liquid crystal phase” is not a positive citation but a functional language. Therefore, the claimed composition is interpreted as a composition containing a liquid crystal compound and a refractive index-controlling agent, which a refractive index-controlling agent can be any component including liquid crystal material. It is known that the liquid crystal composition comprising polymer/liquid crystal, especially liquid crystal molecules at side chain (including rod-like or disc-like), will affect the refractive index of the liquid crystal composition. See sections 2-3 for the rejections. This effective change of the refractive index due to “polymerizable liquid crystal molecules” can be interpreted as a “controlling agent” of the present invention.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1756

3. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hashimoto et al. (US 6,657,690).

The reference discloses an optical compensatory sheet comprises an optically uniaxial or optically biaxial transparent stretched film. The reference further discloses an optically anisotropic layer (polymer film) formed from liquid crystal molecules. The invention further relates to an ellipsoidal polarizing plate and a liquid crystal display equipped with the optical compensatory sheet (col. 1, lines 7-16).

The rod-like liquid crystal molecules of the reference preferably have polymerizable groups. Examples of the polymerizable groups are the same as those of the discotic liquid crystal molecules (Q) (see formula (I) and formula (II) on col. 16 and col. 22, respectively). Also, see the sections “preparation of forming biaxial film” and “preparation of ellipsoidally polarizing plate” in the reference examples. The reference invention can be applied for liquid crystal displays of various modes such as TN, STN and HAN (hybrid aligned nematic) modes.

The reference differs from the claimed invention in that the claimed invention has different value of refractive index with and without the refractive index-controlling agent. However, the reference discloses the comparison of the conventional synthetic polymer film used as an optical compensatory sheet of liquid crystal display with the reference invention. The stretching speed is very slow in comparison with the conventional synthetic polymer film. Therefore, it would have been obvious to those skilled in the art to recognize the advantage of using the reference polymerizable liquid crystal compound

Art Unit: 1756

including rod-like or disc-like and act as a refractive index-controlling agent to improve the biaxial liquid crystal film.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
